

**PROPANE FOR
MINING**

PROPANE MINING ADVANTAGES

Propane provides solutions for all stages of your mining operation. It's the low-emission, safe, reliable choice for off-grid power generation, back-up power, camp heat, and more. Propane power also delivers the same engine performance as diesel in any climate.

Lower emissions and less carbon impact than diesel

Highly portable via truck, rail and pipeline to the most remote areas of Canada

No risk of air, soil or water contamination and remediation

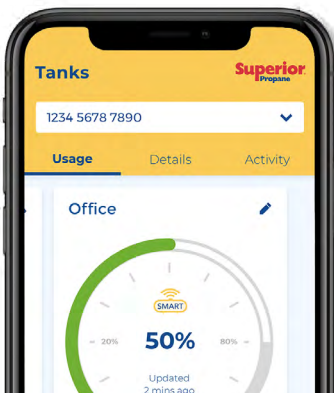

Can be stored indefinitely with no fuel degradation for emergency back-up power

Provides the same peak power capacity as a full-size prime diesel generator

PROPANE VS. DIESEL

	PROPANE	DIESEL
Fuel Cost ¹	Approximately 40% less than diesel	Historically, 40–50% more expensive
Environmental Performance	Reduces GHG emissions by 15% and emits 98% less particulate matter ² Free of noxious fumes and sulfur—a major contributor to acid rain	Risk of not meeting emissions regulations and environmental standards
Safety & Risk Management	Safe to transport and store long-term Vaporizes when released, eliminating the risk of contaminating water, ground or air	Risk of environmentally damaging spills and costly remediation Risk of fuel contamination from long-term storage
Equipment Performance	Burns cleaner for less wear and tear on equipment and longer service intervals to reduce maintenance costs and downtime Improved quality of camp life with a quieter and odour-free source of power	Hard particulates cause equipment damage and more frequent maintenance requirements

“THE SUPERIOR PROPANE TEAM WAS EXTREMELY HELPFUL BY MEETING OUR NEEDS AND LOGISTICS TO HAVE SUFFICIENT PROPANE SAFELY STORED ON SITE FOR SEVERAL WEEKS.”

ROB HICKLIN, SUPPLY CHAIN COORDINATOR, GOLDCORP
